Amir's Roles in ACSys

How Amir Liked Things to Work

What we Really worked on

- ⦿ Translation Validation
- ⦿ Parameterized Systems
 - ⦿ Invisible Invariants
 - ⦿ Counter Abstraction
 - ⦿ Network Invariants
 - ⦿ Invisible Ranking

And also...

- ⦿ Automatic Ranking
- ⦿ Shape(less) Analysis
- ⦿ Deductive Verification (for automation)
- ⦿ Run-time Verification
- ⦿ Synthesis
- ⦿ TLV
- ⦿ Testers (PSL)
- ⦿ Transactional Memories

Things Didn't Always
Come Easy

Things Didn't Always Come Easy

Task	Equipment	Time
Construction of Inductive Assertions	2 Professors of Computer Science	40 hours

Things Didn't Always Come Easy

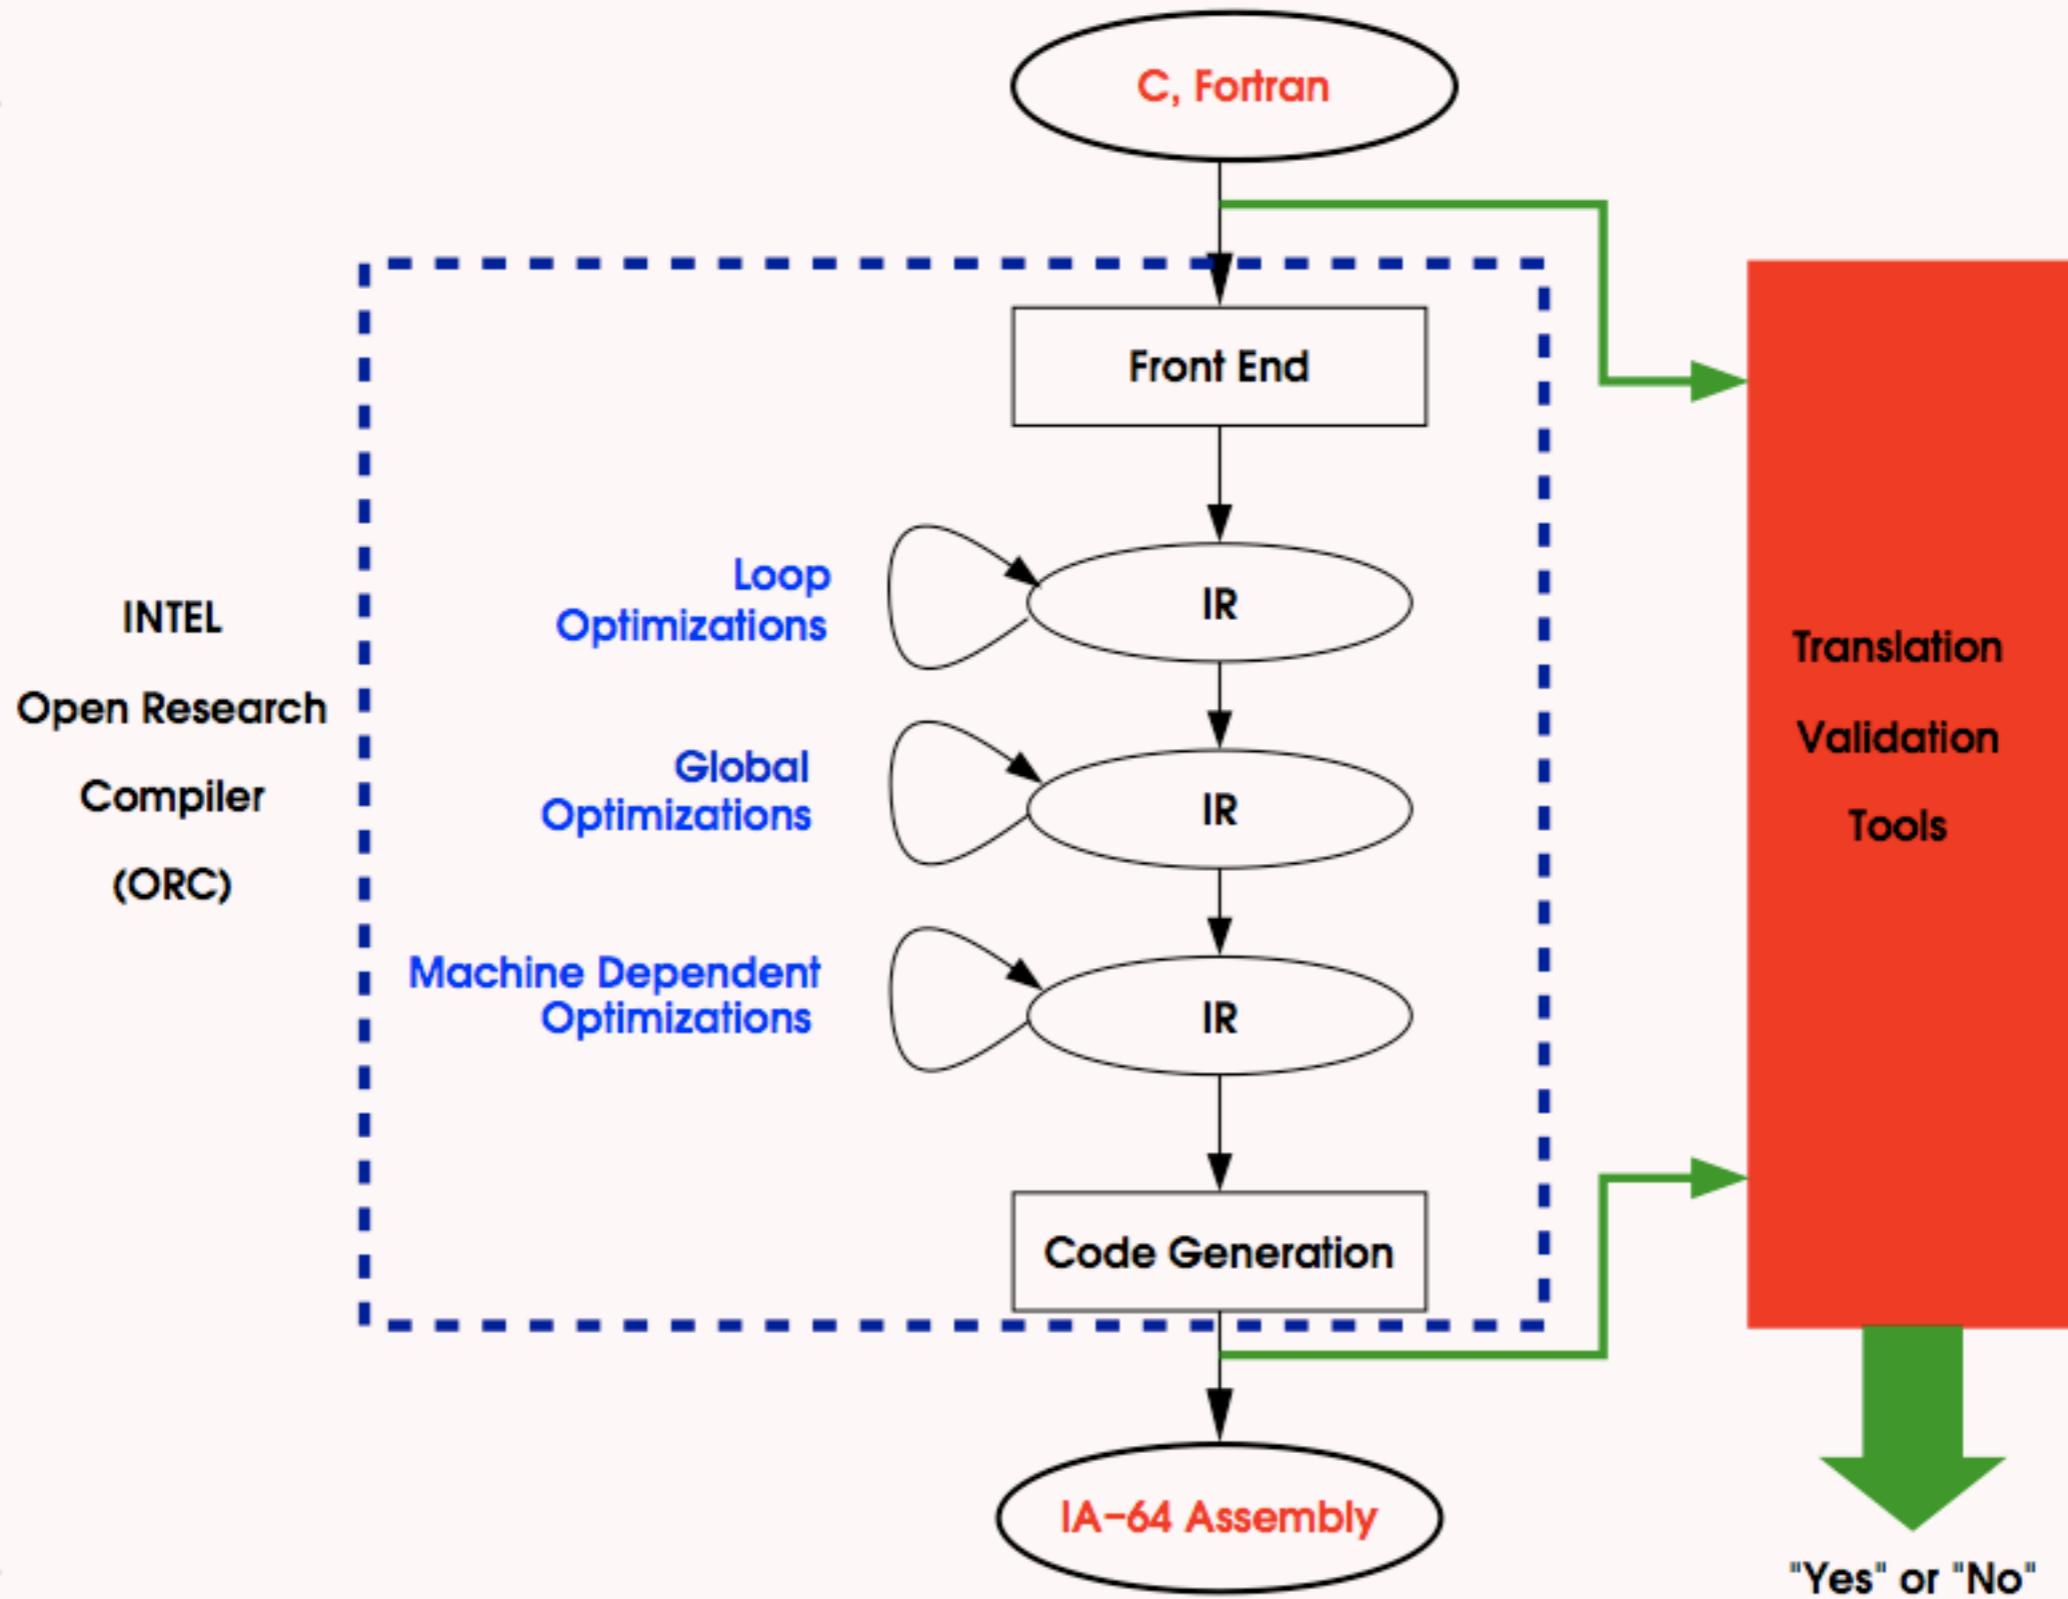

Task	Equipment	Time
Construction of Inductive Assertions	2 Professors of Computer Science	40 hours

Task	Equipment	Time
Construction of Inductive Assertions	1 non Professor of Computer Science	4.578s generate .1s prove

ACSys in Action: TV

- ⦿ Amir: Initial Basic Vision
- ⦿ Ben: Compiler Knowledge
- ⦿ Yi: Initial Implementation
- ⦿ Ying: Loop Optimizations
- ⦿ Clark: Theorem Proving
- ⦿ Ittai: WWW-ing
- ⦿ (Lenore: Cracking the Whip)

Overview of an Ideal TVOC

A Fair Transition System

Amir's Roles
