Homework #0:

Write a program that prints out the lyrics to one or several verses of your favorite song. Be sure to include at least one comment in the program. Pay attention to formatting using the following codes:

`\n` line break  
`\t` tab  
`\"` double quote  
`\'` single quote  
`\\` backslash  

Make sure you can run the program on the machine you will use for your homework this semester. That means you can compile (i.e. IDE is successfully installed and no syntax errors) and run the program.

Send the source code for this program to your grader*. Please specify “homework #0” followed by your name in the message subject line.
