First Processing Lab:

1. Create a window of size 200 x 200 and draw an X in it.
2. Create a window of a size of your choice and draw a tic-tac-toe board. Make sure the boxes which make up the board are equal squares.
3. Draw a stick figure in a window of any size. Please be as creative as you like. If you want to use additional functions not described in class you can use the Processing documentation found here:
